## Science Coverage and Progression EYFS-Year 6

(ref: National Curriculum, White Rose Science curriculum map, ELG & Development Matters)

## **EYFS**

The EYFS framework is structured very differently to the national curriculum as it is organised across seven areas of learning rather than subject areas. The aim of this document is to help subject leaders to understand how the skills taught across EYFS feed into national curriculum subjects.

These statements from the 2020 Development Matters are prerequisite skills for science within the national curriculum. The table below outlines the most relevant statements taken from the Early Learning Goals in the EYFS statutory framework and the Development Matters age ranges for Three and Four-Year-Olds and Reception to match the programme of study for science.

The most relevant statements for science are taken from the following areas of learning:

- Communication and Language
- Personal, Social and Emotional Development
- Understanding the World

Three & Four Year olds	Communication and Language	Understand 'why' questions, like: "Why do you think the caterpillar got so fat?"	
	Personal, Social and Emotional Development	Make healthy choices about food, drink, activity and toothbrushing.	
	Understanding the World	<ul> <li>Use all their senses in hands-on exploration of natural materials.</li> <li>Explore collections of materials with similar and/or different properties.</li> <li>Talk about what they see, using a wide vocabulary.</li> <li>Begin to make sense of their own life-story and family's history.</li> <li>Explore how things work.</li> <li>Plant seeds and care for growing plants.</li> <li>Understand the key features of the life cycle of a plant and an animal.</li> <li>Begin to understand the need to respect and care for the natural environment and all living things.</li> <li>Explore and talk about different forces they can feel.</li> <li>Talk about the differences between materials and changes they notice.</li> </ul>	

Reception	Communication and Language		<ul> <li>Learn new vocabulary.</li> <li>Ask questions to find out more and to check what has been said to them.</li> <li>Articulate their ideas and thoughts in well-formed sentences.</li> <li>Describe events in some detail.</li> <li>Use talk to help work out problems and organise thinking and activities, and to explain how things work and why they might happen.</li> <li>Use new vocabulary in different contexts.</li> </ul>
	Personal, Social and Emotional Development		<ul> <li>Know and talk about the different factors that support their overall health and wellbeing:         <ul> <li>regular physical activity</li> <li>healthy eating</li> <li>toothbrushing</li> <li>sensible amounts of 'screen time'</li> <li>having a good sleep routine</li> <li>Being a safe pedestrian</li> </ul> </li> </ul>
	Understanding the World		<ul> <li>Explore the natural world around them.</li> <li>Describe what they see, hear and feel while they are outside.</li> <li>Recognise some environments that are different to the one in which they live.</li> <li>Understand the effect of changing seasons on the natural world around them.</li> </ul>
ELG	Communication and Language	Listening, Attention and Understanding	Make comments about what they have heard and ask questions to clarify their understanding.
	Personal, Social and Emotional Development	Managing Self	Manage their own basic hygiene and personal needs, including dressing, going to the toilet and understanding the importance of healthy food choices.
	Understanding the World	The Natural World	<ul> <li>Explore the natural world around them, making observations and drawing pictures of animals and plants.</li> <li>Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.         Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.     </li> </ul>

Living Things			
Year 2	Year 4	Year 5	Year 6
Explore and compare the differences	Recognise that living things can be	Describe the differences in the life cycle	Describe how living things are classified
between things that are living, dead and	grouped in a variety of ways.	of a mammal, an amphibian, an insect,	into broad groups according to common
things that have never been alive.	(Vertebrates and invertebrates)	and a bird.	observable characteristics and based on
			similarities and differences including
Identify that most living things live in	Explore and use classification keys to	Understand the life processes of	micro-organisms, plants and animals.
habitats to which they are suited and	help group, identify and name a variety	reproduction in some plants and animals	
describe how different habitats provide	of living things in their local and wider	including sexual and asexual	Give reasons for classifying plants and
for the basic needs of different kinds of	environment.	reproduction.	animals based on specific characteristics.
animals and plants, and how they			
depend on each other.	Recognise that environments can change		
	and that this can sometimes pose		
Identify and name a variety of plants and	dangers to living things.		
animals in their habitats, including			
microhabitats.			
Describe how animals obtain their food			
from plants and other animals, using the			
idea of a simple food chain, and identify			
and name different sources of food.			

Plants			
Year 1	Year 2	Year 3	
Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees.	Observe and describe how seeds and bulbs grow into mature plants.	Identify and describe the functions of different parts of flowering plants: roots, stem, trunk, leaves and flowers.	
Identify and describe the basic structure of a variety of	Find out and describe how plants need water, light		
common flowering plants, including trees.	and a suitable temperature to grow and stay healthy.	Explore the requirements of plants for life and growth. (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant.	
		Investigate the way in which water in transported within plants	
		Explore the part that flowers play in the life cycle of	
		flowering plants, including pollination, seed formation and seed dispersal.	

Materials			
Year 1	Year 2	Year 5	
Distinguish between the object and material from	Identify and compare the suitability of a variety of	Compare and group together everyday materials on the	
which it is made.	everyday materials, including wood, metal, plastic,	basis of their properties, including their hardness,	
	glass, brick, rock, paper and cardboard for particular	solubility, transparency, conductivity (electrical and	
Identify and name a variety of everyday materials,	uses.	thermal) and response to magnets.	
including wood, plastic, glass, metal, water and rock.			
	Find out how the shapes of solid objects made from	Know that some materials will dissolve in liquid to form	
Describe the simple physical properties of a variety of	some materials can be changed by squashing, bending,	a solution, and describe how to recover a substance	
everyday materials using scientific vocabulary. (e.g.	twisting and stretching.	from a solution.	
hard/soft, stretchy/stiff, shiny/dull, rough/smooth,			
bendy/ not bendy, waterproof/ not waterproof,		Use knowledge of solids, liquids and gases to decide	
absorbent/ not absorbent, opaque/transparent)		how mixtures might be separated, including through	
		filtering, sieving and evaporating.	
Compare and group together a variety of everyday			
materials on the basis of their simple physical		Give reasons based on evidence from comparative and	
properties. (e.g. hard/soft, stretchy/stiff, shiny/dull,		fair tests for the particular uses of everyday materials,	
rough/smooth, bendy/ not bendy, waterproof/ not		including metal, wood and plastic.	
waterproof, absorbent/ not absorbent,			
opaque/transparent)		Demonstrate that dissolving, mixing and changes of	
		state are reversible changes.	
		Foliation that are a selection as the foliation of	
		Explain that some changes result in the formation of	
		new materials, and that this kind of change is not	
		usually reversible, including changes associated with	
		burning and the action of acid on bicarbonate of soda.	
		Use scientific vocabulary (Burning or rusting) to	
		describe some irreversible changes.	

## Rocks

### Year 3

Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties.

Describe in simple terms how fossils are formed when things that have lived are trapped within rock.

Recognise that soils are made from rock and organic matter.

### **States of Matter**

#### Year 4

Compare and group materials together, according to whether they are solids, liquids or gases.

Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which it happens in degrees Celsius.

Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.

Electricity		
Year 4	Year 6	
Identify common appliances which run on electricity.	Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.	
Construct a simple series electrical circuit, identifying and naming its basic parts,		
including cells, wires, bulbs, switches and buzzers.	Compare and give reasons for variations in how components functions, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches.	
Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery.	Use recognised symbols when representing a simple circuit in a diagram. (Bulb, switch, buzzer, cell and wire)	
Recognise that a switch opens and closes a circuit and associate this with whether or nor not a lamp lights in a simple series circuit.		
Recognise some common conductors and insulators, and associate metals with being good conductors.		

# **Earth and Space**

### Year 5

Describe the movement of the Earth and other planets relative to the sun in the solar system.

Describe the movement of the moon relative to the Earth.

Describe the sun, Earth and moon as approximately spherical bodies.

Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.

# **Seasonal Changes**

#### Year 1

Observe and describe weather associated with the seasons and how day length varies.

Observe changes across the 4 seasons.

#### Sound

#### Year 4

Identify how sounds are made, associating some of them with something vibrating.

Recognise that vibrations from sounds travel through a medium to the ear.

Find patterns between the pitch of a sounds and features of the object that produced it.

Find patterns between the volume of a sound and the strength of the vibrations that produced it.

Recognise that sounds get fainter as the distance from the sound source increases.

Light		
Year 3	Year 6	
Recognise that they need light in order to see things and that dark is the absence of light.	Recognise that light travels in straight lines.	
Notice that light is reflected from surfaces.	Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye.	
Recognise that light from the sun can be dangerous and that there are ways to protect their eyes.	Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.	
Recognise that shadows are formed when a light from a light source is blocked by an opaque object.	Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.	
Find patterns in the way that the size of shadows change.		

Forces and Magnets			
Year 3	Year 5		
Compare how things move on different surfaces.	Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object.		
Notice that some forces need contact between 2 objects (push/pull), but that			
magnetic forces can act at a distance.	Identify the effects of air resistance, water resistance and friction, that act between moving surfaces.		
Observe how magnets attract and repel each other and attract some materials but			
not others.	Recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect.		
Compare a group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials.			
Describe magnets as having 2 poles.			
Predict whether 2 magnets will attract or repel each depending on which poles they are facing.			

# **Evolution and Inheritance**

### Year 6

Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.

Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents.

Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.
